## Problem

In one of the largest suppliers of APIs and their intermediates all over the world, there was no system to visualize different cost saving matrices on the production floor.

## Diagnosis

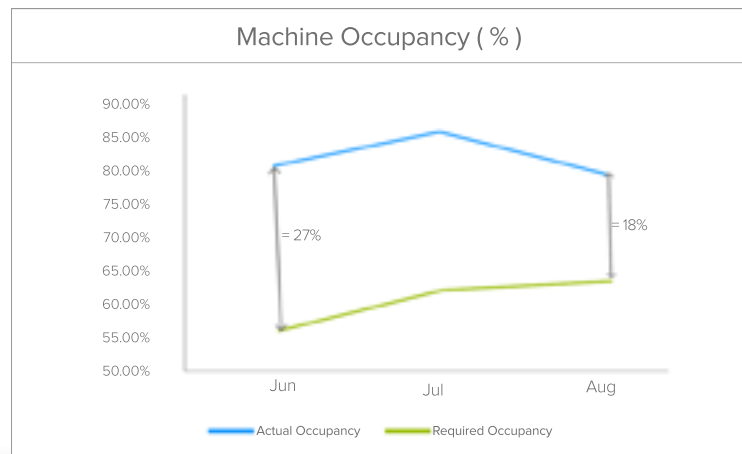

IPF helped production team visualize the huge gap between actual occupancy and required occupancy of the machine.

## Action

The same output could be generated by 27% less occupancy saving labor cost, utilities cost, overheads etc.

## Impact

IPF highlighted potential loss of Rs 1.32 Cr. in a span of just three months, allowing the company to react and save costs.
